Narjis Eehab

Marketing | Backend Web Developer

Iraq - Baghdad | +964 7714820249 | nargiseehab@gmail.com | **LinkedIn** | GitHub

---

Objective

Motivated **Computer Science graduate** with solid foundation in web development, currently advancing front-end and back-end skills through hands-on learning and online courses. Seeking a junior web development opportunity to apply and grow my technical and problem-solving skills in a real-world environment.

Experience

Zayya Application – Baghdad, Iraq
Customer Service & Order Management Officer | July – October 2025

- Monitored and managed customer orders through the Zayya mobile application (iOS & Android).
- Handled customer inquiries and provided support to ensure service quality.
- Coordinated with the team to improve order processing and client satisfaction.

Almalki Company – Baghdad, Iraq
Promoter & Data Archiver | July – August 2024

- Promoted products and services to customers.
- Archived and organized company data.

Education

University of Technology, Bachelor of Science in Computer Science 2021 – 2025

Major: Information Systems.

Courses & Training

Full-Stack Development using C# – ITS Program | *Hub200, in collaboration with QiCard and Digital Zone*
Duration: 6 months (Ongoing)

- Practical hands-on training on real-world projects and hackathons.
- Curriculum designed based on Iraqi companies' technical needs.
- Focused on **front-end and back-end development** using C#.
- Included **MiniApps** projects simulating real-world applications.
- Professional English and career development sessions (CV, interviews, freelancing).

Projects

car spare parts

- Developed a responsive web interface for browsing car spare parts using **HTML**, **CSS**, and **JavaScript**.
- Collaborated within a team to implement product listing and search functionalities.
- Integrated a backend database using **PostgreSQL**; worked with a developer to resolve connection issues and learned the process of setting up and querying the database.
- Documented technical challenges and solutions to support future development stages

Cinema Booking System

This project is a console-based Cinema Booking System developed in C#. It allows users to view available movies, check showtimes, and book tickets directly through the terminal. The system supports CinemaDay discounts and organizes data using object-oriented principles for better scalability and clarity. All operations are executed via command-line interface using GitHub CLI and .NET tools.

Skills

Technical Skills:

- HTML, CSS, JavaScript, basic C#
- Social Media Management
- Microsoft Office Suite

Soft Skills:

- **Communication:** Interacted with customers during promotional work.
- **Organization:** Maintained accurate and well-structured data archives.
- **Team Collaboration:** Assisted in organizing and gathering information for group projects.
- **Problem-Solving:** Addressed challenges in data organization and project planning.
- **Adaptability:** Quickly adjusted to different roles and work environments.
- **Time Management:** Effectively managed tasks and responsibilities within tight timeframes.
- **Creativity:** Developed engaging social media and advertising content.
